A. How to Design

B. Visual Encoding and Visual Idiom

Task 1: Compare Distributions (Member vs. Casual Trends)

(Marketing/Urban Planner)

Goal:

- **Design Option A (Some Chart):** blablabla *
- **Design Option B (Baseline):** blablabla *

Task 2: Summarize Flows (OD Connectivity)

(Commuter/Urban Planner). (Since we lack GPS traces, we visualize direct Origin-Destination (OD) connections (1-hop), not street-level paths.)

Goal:

- **Design Option A (Some Chart):** blablabla *
- **Design Option B (Baseline):** blablabla *

Task 3: Rank Stations (Identify Top Hubs)

(Ops/Marketing)

Goal:

- **Design Option A (Some Chart):** blablabla *
- **Design Option B (Baseline):** blablabla *

Task 4: Identify Spatial Regions (Service Coverage)

User story 3 & 5

Goal:

- **Design Option A (Some Chart):** blablabla *
- **Design Option B (Baseline):** blablabla *

Storyboard: Optimizing the Morning Commute
